

Why shouldn't XM radio be able to provide this service to their paid subscribers? I can get traffic reports every couple of minutes! instead of having to wait for a time deemed appropriate by the broadcasters. Let them compete in a FREE MARKET! That's what this country's economic and sociological tenents are based on! Maybe it will encourage the members of the NAB to improve their services.

Please reject the NAB petition, 04-160 and help preserve the free market!
